

All4Pack Paris preview

LIQUID ASSETS

Global packaging solutions company Retal will be presenting its complete range of PET preforms, closures, containers and films, including its market-leading multilayer technology.

Retal's multilingual team is looking forward to meeting customers and industry experts to discuss the ever-changing trends and the all-important demands of consumers, including the need for more sustainable solutions.

PROTECT WITH MULTILAYER

Emilie Chassagnard-Perreau, Commercial Manager at Retal France, says, "one example where we have been meeting consumer demands and leading is in the multilayer preforms market across our active European markets since 2003. We have considerable experience in what is a relatively new technology. Multilayer is the technology to protect the product and the environment. The objective is to compete with the performance of glass bottles while keeping the advantages of plastic: lighter weight and reduced carbon footprint."

Retal understands that the beverage industry is in an exciting yet challenging phase, with the environmental concerns of brands and consumers needing to be balanced with the performance and practicalities of packaging. Its cost-effective multilayer preforms excel across all categories, with all Retal solutions carefully considered for market appeal.

Chassagnard-Perreau concludes, "We offer a broad range of complete solutions that allow us to develop, create and supply packaging that meet the strict demands of our global beverage and food brand customers. We look forward to sharing our offer at All4Pack."

Retal develops and manufactures high quality polyethylene terephthalate (PET) packaging solutions, including preforms, closures, containers and films. Retal employs around 2800 people in Europe, Russia, the Middle East and the USA, and supplies customers worldwide. Strongly focused on quality and flexibility, Retal is ISO 9001, ISO 14001 and ISO 22000 accredited. Parent company Retal Industries Ltd is owned by Anatoly Martynov and is headquartered in Limassol, Cyprus.
