The strong growth of global plastic packaging manufacturer Retal’s Pennsylvania factory will now continue with the confirmation of an extensive expansion program, which will see its output more than triple over the next three years.

Darius Janulionis, President and CEO of Retal PA called its a true mark of confidence in the company. “Over half of the investment is a bank loan, which highlights the credibility of our expansion. We have grown continually since we established our factory here in Donora in 2016 and will commit to producing over two billion preforms a year following this latest investment,” he said.

In his view, the driving force behind the continued expansion at the Pennsylvania site is vocal the strength of the team: “We all stand on each other’s shoulders to keep succeeding and, as we grow rapidly, we continue to rely on each other. I can happily say that our team is motivated, friendly and open-minded, so we’re keen to meet people that would like to join us on a permanent basis. We are increasing our local workforce and are actively looking for suitably skilled people to fill a variety of positions.”

Retal develops and manufactures polyethylene terephthalate (PET) packaging solutions, including preforms, closures, containers and films. The company is a subsidiary of Retal Industries Ltd, headquartered in Limassol, Cyprus.

Globally active, Retal supplies customers in over 60 countries worldwide. Strongly focused on quality and flexibility, Retal is ISO 9001, ISO 14001 and ISO 22000 accredited.
