RETAL publishes its fourth annual Sustainability Report, proudly highlighting the quantifiable results of its ongoing commitment to implementing CSR across the business.

Guided by the ISO 26000 standards on CSR management and the GRI standard 2021, this clear, easy-to-read yet complete document is available for all stakeholders on RETAL's website and offers a full insight into the continuously increasing RETAL CSR agenda driven by Sustainability Director Emmanuel Duffaut.

Duffaut says, "I am glad to share RETAL's continuous progress on our sustainability journey through this fourth annual report. As we advance and increase our actions and improve results, reporting efficiently and keeping our stakeholders informed is a paramount aspect. We strive to make this report an easy and interesting read while including all the required data and information for full transparency and accountability."
